## SUMMARY

A former student athlete that is self-motivated with excellent leadership such as working with and motivating as well as building relationships with team members consequently achieving team success. In addition, I am a passionate student who devotes many hours per week to studies, webinars, meetings, and working improving my education in technology, entrepreneurship, and many of other hobbies and skills also I love attending Hackathons. I am a UGAHacks 7 attendee and contributor and other MLH hackathon events. I have experience with many programming languages but, always developing my proficiency in Python, JavaScript, and other computer applications such as Excel, PowerPoint, and recently due to complications from Covid-19 Microsoft Teams. I am an excellent problem solver with a passion for the ability to creatively analyze and organize information in an efficient manner. Skilled at managing and collaborating with others to produce on-time content delivery within an agreed upon scope. Finally, I am effective in utilizing applicable communication methods and tools to deliver focused and persuasive oral and written messages to intended recipients.
